DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4-7, drawn to methods, a system, software product, and program storage device to transmitting information to an information terminal connected to a network, classified in class 713, subclass 171.
- II. Claims 2 and 3, drawn to methods of transmitting information to an information terminal connected to a network, classified in class 709, subclass 229.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as using a program other than a license key to disable at least part of the function of a downloaded program. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2143

their different classification, restriction for examination purposes as indicated is proper.
